***RYR-1 Foundation Benefit Dinner &
Screening of “Hodgson” Documentary***

July 18, 2019 - The RYR-1 Foundation, the only organization in the world that exists exclusively to serve the needs of and advocate for individuals with RYR-1-related diseases, will be hosting a Benefit Dinner and Screening of the **“Hodgson”** documentary on Tuesday, August 27, 2019 at 7:00 pm at Mad Mex Shadyside (220 S Highland Ave, Pittsburgh, PA 15206).

“Hodgson” is a 20 minute documentary that profiles Cody Hodgson, a former star in the National Hockey League, who was forced to retire at the age of 26 due to complications of RYR-1-related diseases. **To purchase a ticket to this fundraiser or make a donation to support the event, please visit:**
www.crowdrise.com/o/en/campaign/madmex2019.

All proceeds will go towards the RYR-1 Foundation to support its efforts in finding a cure for this inherited condition. To view a trailer of “Hodgson,” please go to:
www.ryr1.org/hodgsontrailer.

“Hopefully, the RYR-1 Foundation and I can help to not only push for a cure, but also help the parents, patients, and families affected by RYR-1-related diseases now so that they can better understand their condition, take the appropriate precautions, and have a treatment available to them,” said Cody Hodgson.

“Because RYR-1 myopathy is so rare, the RYR-1 Foundation is not only supporting research to find a cure, but also attempting to raise awareness of this condition,” said Michael F. Goldberg, MD, MPH, President of the RYR-1 Foundation. “The recently produced “Hodgson” documentary does an incredible job of explaining how RYR-1 can affect a wide variety of individuals, including an elite athlete like Cody. The Mad Mex event will be a great venue to demonstrate the important work of the RYR-1 Foundation.”

The RYR-1 Foundation is appreciative of the sponsors for this upcoming event:

About the RYR-1 Foundation

The Pittsburgh, Pennsylvania-based public charity was launched in October 2014 by members of the Goldberg family, who have been affected by RYR-1 muscle disease. It is currently the only organization that exists solely to advocate for and serve the needs of patients with RYR-1 myopathy, the most common cause of congenital myopathy. The mission of the RYR-1 Foundation is to support research leading to effective treatment or a cure for RYR-1 related diseases, to educate physicians about these diseases, and to provide patient/family support and advocacy. The RYR-1 Foundation is a public charity, designated as a 501(c)(3) by the IRS. To learn more about the RYR-1 Foundation, please go to: www.RYR1.org.
